

ONSITE ISSUANCE SUITE

IMMEDIATE DISBURSEMENT OF DONOR PAYMENTS

Wirecard North America has been developing top-tier compensation solutions and innovative end-to-end technologies for public institutions and businesses from a wide range of industries for more than 20 years. One of these solutions, the Onsite Issuance Suite, enables instant, convenient remuneration of payees as soon as services have been delivered.

Whether your business operates in the plasma donation, blood donation, or consignment industry, cash and check handling leads to high costs and complex processes. Wirecard helps companies to optimize this payment process using digital technologies. In addition to providing significant cost savings, this also leads to a reduction in operating costs and administrative work.

The Onsite Issuance Suite enables immediate payments via prepaid card. This enables merchants and donation facilities to transfer payments due to the respective donors directly after their visit. With Wirecard's solution, all payments processes can be made more efficient while maximizing your payees' satisfaction.

The Solution

The Onsite Issuance Suite is a payment solution that replaces previous disbursement methods with a reloadable prepaid card. Wirecard provides blood and plasma donation facilities with virtual and customized payment methods. A real-time rewards platform can be added to this digital payment service to further increase payee loyalty and satisfaction.

Key Benefits
